D-runway News Letter [No.3]

http://www.pa.ktr.mlit.go.jp/haneda

At pier section and connected taxiway, the installation both steel jacket and Slab is going under way steadily.

Installation of steel jacket got started to work on Jan 8, 2008.

As of May 25, 35 were completed among 198 in Pier section and 6 were completed in Connection taxiway.

Also the full-scale installation work of PCa slab (Precast Concrete slab) and UFC slab (Ultra high strength Fiber reinforced Concrete slab) on a steel figure began.
